Market Review

FBM KLCI and FBM Shariah slide 4.9% and 2.0% respectively in August, wiping out some of the previous month's gains. This was attributed to a negative month for the gloves sector which could be due to investors locking in gains amidst rising vaccine news flows. Malaysia's June 2020 unemployment rate declined month-on-month to 4.9% from a record-high of 5.3% in May 2020 as more sectors, including the services industry, reopened due to the implementation of the nation's recovery movement control order to revive the country's economy while curbing the Covid-19 pandemic. The trade balance printed a surplus of RM25.2 billion in July, up from a surplus of RM20.9 billion in June. Meanwhile, Bank Negara Malaysia's international reserves amounted to USD104.2 billion as at July 30, 2020, slightly higher compared with USD104.0 billion as at July 15, 2020. Ringgit strengthened by 1.78% to RM4.16 against USD. Brent and WTI crude continued to post their fourth monthly gains of 4.6% and 5.8% respectively with oil demand driven by expected economic activity recovery while OPEC+ continued with their agreed production cuts on the supply side. CPO prices followed in tandem rising 4.1% for the month. Gold prices started the month strong peaking at USD2,063 but then experienced its worst day decline in 7 years plunging 5.7% to USD1,911. The precious metal then traded sideways closing 1% lower over the month at USD1,967.
