Market Review

World Health Organization declared a global pandemic condition on 11th March following the exponential spread in the US and Europe. Concerns over the economic impact from lockdown measures globally and liquidity tightness triggered a sharp correction across financial markets. The breakdown of OPEC and Russia's talk to extend oil production cuts on the 6th March, and Saudi Arabia's subsequent decision to instead increase output led to a downward spiral in oil price to as low as USD22.7 per barrel, the lowest level since 2003. Locally, Bank Negara cut Overnight Policy Rate by 25 bps, reduced Statutory Reserve Requirement ratio from 3% to 2% and launched a six month loan moratorium, while the government also revealed a RM250bil stimulus package to mitigate potential economic downturn from the Movement Control Order implemented locally. FBMKLCI index fell sharply to end the month at 1,350.89 points, down 8.9% MoM, and FBM Emas Shariah registered a decline of 9.1% MoM, both still outperforming most global markets. The Ringgit depreciated 2.5% against the USD, alongside the general weakening in emerging market currencies.
