## Fund Manager's Review

For the period ended 30 June 2020, BSN Dana Shariah Money Market registered an annualised return of 2.50%, as compared to its benchmark's return of 1.23%, thus outperformed its benchmark by 1.27%. For the period under review, the dividend declared was at RM0.002.

Economic activity contracted sharply in the second quarter of the year, due to measures introduced to contain the pandemic globally and domestically. Following the re-opening of the economy since early May, economic activities have begun to recover. At its meeting on last May 2020, the Monetary Policy Committee (MPC) of Bank Negara Malaysia decided to reduce the Overnight Policy Rate (OPR) to 2.00%. The reduction in the OPR provides additional policy stimulus to accelerate the pace of economic recovery. The MPC will continue to assess evolving conditions and their implications on the overall outlook for inflation and domestic growth. The next MPC meeting will be held on 7<sup>th</sup> July 2020.
