LETTER FROM THE CHIEF EXECUTIVE OFFICER

Dear Investor,

The management of Permodalan BSN Berhad takes great pleasure in introducing BSN Dana Al-Jadid to you. "Al-Jadid" denotes a new beginning in Arabic and as the name suggests, BSN Dana Al-Jadid marks a new phase for our company in providing quality investment management services to the Rakyat. This will be our second fund after Amanah Saham BSN (ASBSN) and is in line with the BSN Group mission of encouraging savings and prudent financial investment management amongst the Rakyat so as to enhance economic prosperity. It is also our goal to provide unit trust funds which would be easily accessible and affordable to the general public.

Essentially, through BSN Dana Al-Jadid we would seek to provide you with capital appreciation and income distribution with a strategy of investing in a portfolio of Shariah-compliant equity and equity related securities. To safeguard your investments against unfavourable market swings, we may invest in a mix of Shariah-compliant equities, Islamic debentures and Islamic money market instruments. As with all forms of investments, we would advise you that there are risks associated with the underlying investments of Dana Al-Jadid. These would include market risk, individual stock risk or issuer risk, liquidity risk, interest rate risk and reclassification of Shariah status risk. However, as an essential part of prudent fund management practice, we would use risk management measures including diversification techniques employed on stock, sector and maturity (in the case of sukuk) and the measured selection of Shariah-compliant stock and sukuk.

This fund would be appropriate for you if you are seeking capital appreciation as well as income distribution and if you can accept moderate to high risk over a period of 3 to 5 years. We have also made it very affordable by allowing a minimum initial investment of RM500 and subsequent additional investments of RM100 each. A sales charge of 3% of the NAV per unit of the Fund may be imposed at all distribution channels which may be negotiable at the manager's discretion. For redemptions, a charge of 3% of the NAV per unit of the Fund may also be imposed for administrative costs. An annual management fee of 1.5% per annum and annual trustee fee of 0.08% per annum will also be imposed on the NAV of the Fund calculated on daily basis and payable monthly.

Furthermore, as an alternative investment if you are an existing ASBSN unit holder, you would be allowed to switch.

To make BSN Dana Al-Jadid easily accessible to you, collection centers are available at all BSN Branches throughout Malaysia (we have listed this on Page 12 for your convenience).

We hope that through BSN Dana Al-Jadid, we would be able to provide you with a new investment experience that would be as fulfilling to you as it is to us in offering our services to you.

Thank you.

JALALUDDIN MOHD ARIF
Executive Director/Chief Executive Officer

Stock Risk or Issuer Risk This risk refers to the individual risk of the respective companies issuing the Shariah-compliant securities. 4. RISK FACTORS

Investing in a unit trust fund enables the investors to enjoy the benefit and advantage of diversifying their investments and assets. As with all investments, however, there are related risks.

Risks, though, are not necessarily bad or negative. They are something to be aware of and to be managed. Proper risk management accommodates investment volatility. This part of the Prospectus describes risks typical to the unit trust funds and how those risks are managed.

GENERAL RISKS OF THE FUND

The following is a description of the general risk factors affecting the Fund:

Management Company Risk

There is the risk that the management company may not adhere to the investment mandate of the Fund. With close monitoring by the investment committee, back office system being incorporated with limits and controls, and regular reporting to the senior management team, the management company is able to manage such risk.. Poor management of the Fund may also jeopardise the investment of unit holders through the loss of their capital invested in the fund.

Loan Financing Risk

This risk occurs when the investor takes a financing provided by any financial institution to finance his/her purchase of unit trusts funds. In the event that the investment falls below a certain level, the bank may require additional collateral, which the investor is unable to afford. In addition, the investor may not be able to fulfil the instalment obligations due to unforeseen circumstances.

Other factors to consider, for instance: -

the higher the margin of financing, the greater the potential for losses as well as gains;

if a financing taken is a variable rate financing, and if the rate rises, the total payment amount will thus increase; and if unit prices were to fall beyond a certain level, the investor will need to top up additional amounts either in cash or collateral. If the topping-up is not made within the prescribed time, his/her units may be sold to settle the financing. Investors are advised to seek Islamic financing to finance their acquisition.

Fund Management Risk

The performance of any unit trust fund depends on the experience and expertise of the investment managers. Poor management of the unit trust fund may jeopardize its performance.

Country Risk

This risk relates to the likelihood that changes in the business environment will occur that reduce the profitability of doing business in a country. These changes can adversely affect operating profit as well as the value of the assets. The prices of Shariah-compliant securities may also be affected by the political and economic conditions of the country in which the Shariah-compliant securities are issued.

Futures Contracts Risk

There are risks associated with the participation of the funds in Islamic futures contracts. As trading of Islamic futures is conducted on an initial margin basis, a relatively small price movement in an Islamic futures contract may result in an immediate and substantial loss or gain for the funds. This may result in high volatility in the NAV of the fund.

SPECIFIC RISKS OF THE FUND

The following is a description of the specific risk factors affecting the Fund:

Market Risk

This risk refers to changes and developments in regulations, politics and the economy of the country. The very nature of a unit trust fund, however, helps mitigate this risk because a fund would generally hold a well-diversified portfolio of Shariah-compliant securities from different market sectors that even with the collapse of any one Shariah-compliant security or any one market sector would not impact too greatly on the value of the fund.

Despite the diversification of the investments held by the Fund, systemic market risk cannot be eliminated by diversification. This stems from the fact that there are other economy-wide perils which threaten all businesses. That is why investors are exposed to market uncertainties; no matter how many different investments are held, fluctuations in the market caused by uncertainties in the economy, political and social environment will affect the market price of unit trust funds. The degree and manner in which the relevant market factors are affected by such uncertainties may not necessarily be constant or predictable at all times, and may be influenced by sentiment and supply and demand factors in the underlying markets.

Stock Risk or Issuer Risk

This risk refers to the individual risk of the respective companies issuing the Shariah-compliant securities. The risk includes but is not limited to changes in consumer tastes and demand, legal suits, competitive operating environments, changing industry conditions and management omissions and errors. However, this risk is minimised through investing in a wide range of companies in different sectors and thus function independently from one another.

Credit / Default Risk

Credit risk arises when there is a possibility that the issuer is unable to pay profit due and/or principal amount on time. Sukuk/money market instrument/deposit placements are subject to credit/default risk in the event that the issuer of such instruments is faced with financial difficulties, which may decrease their credit worthiness. This in turn may lead to default in the payment of principal and profit. To minimise this risk, the Fund will invest in high quality securities.

Interest Rate Risk

Interest rate risk is a general economic indicator that will have an impact on the management of funds regardless of whether it is a Shariah-based fund or otherwise. It does not in any way suggest that the Fund will invest conventional financial instruments. All the investments carried out for the Fund are in accordance with Shariah requirements. The reason for this is because the high level of interest rates will inevitably affect corporate profits and this will have an impact on the value of Shariah-compliant equity and the demand for sukuk.

The risk is crucial in a sukuk fund since sukuk portfolio management depends on forecasting interest rate movements. Demand for sukuk move inversely to interest rate movement, therefore as interest rates rise, the demand for sukuk decrease and vice versa. Furthermore, sukuk with longer maturity and lower profit rates are more susceptible to interest rate movements.

The Fund is not exposed to interest rate risk as the Fund's investment in financial instruments carry fixed profit rate and are measured at amortised cost. As such, sensitivity analysis is not disclosed.

The sukuk and Islamic money market instruments are subject to interest rate fluctuations. Such investments may be subject to unanticipated rises in interest rates which may impair the ability of the issuers to make payments of profits and principal, especially if the issuers are highly leveraged. An increase in interest rates may therefore increase the potential for default by an issuer. To address this risk, the Fund's portfolio in sukuk and Islamic money market instruments will be diversified into securities with varying maturity periods.

Inflation Risk

A unit trust fund is subject to the risk of an investor's investment not growing proportionately with the inflation rate making the investor's purchasing power net of inflation fall over time.

Liquidity Risk

Liquidity refers to the ease of converting an investment into cash without incurring an overly significant loss in value. If a unit trust fund has a large portfolio of Shariah-compliant stocks issued by smaller companies, the relatively less liquid nature of those Shariah-compliant stocks can cause the value of the fund to drop; this is because there are generally less ready buyers of such Shariah-compliant stocks as compared with the Shariah-compliant stocks of larger and more established companies. This risk is managed by taking greater care in Shariah-compliant stock selection and diversification.

Non-compliance Risk

This refers to the risk that the Manager and others associated with the Fund do not follow the rules set out in the Fund's constitution, or the law that governs the Fund, or will act fraudulently or dishonestly. It also includes the risk of the Manager not complying with internal control procedures. The non-compliance may expose the Fund to higher risks that may result a fall in the value of the Fund.

Such risk is mitigated by the compliance unit of the management company which oversees the entire compliance matters of the management company.

Reclassification of Shariah Status Risk

The risk that the currently held Shariah-compliant securities in the portfolio of Shariah-based funds may be reclassified to be Shariah non-compliant upon review of the securities by the Shariah Advisory council of the Securities Commission performed twice yearly. If this occurs, the value of the fund may be adversely affected where the Manager will take the necessary steps to dispose of such securities.

5. HOW THE FUND INVESTS

OBJECTIVES

The investment objective of BSN Dana Al-Jadid is aims to achieve capital appreciation and income distribution by investing in equity and equity-related securities that comply with Shariah requirements.

Any material change to the investment objective of the fund would require unit holder's approval.

INVESTMENT POLICIES AND STRATEGIES OF THE FUND

During the term of this Prospectus, the Fund's asset allocation strategies will be dynamic such that the Fund may invest up to 100% of its NAV in Shariah-compliant equity and equity-related securities. For defensive considerations, the Fund may lower the Shariah-compliant equity exposure and invest in a mix of Islamic debentures and Islamic money market instruments if the outlook for the equity markets is deemed to be unfavourable. Whilst the Fund is actively managed, at any one point in time, the Fund may hold 100% of its NAV in cash and other forms of Shariah-based liquid assets, depending on market conditions.

The Fund employs a combination of top-down and bottom-up style of management. Key macro factors are determined at the onset of the portfolio construction before asset allocation and bottom-up Shariah compliant equity and sukuk selections are made. Asset allocation is dynamic, with observations made monthly or when necessary.

The Shariah-compliant equity investment of the Fund will primarily focus on a dynamic mix of small- to large-cap Value (PER) and Growth (EPS Growth) Shariah-compliant stocks in the sectors with strong conviction. Generally, companies with established reputation, market leader, earnings growth and visibility as well as financial strengths over the medium to long-term are selected. Additionally, laggards and undervalued Shariah compliant stocks with low PER and high EPS growth relative to sector, peers and market will also be identified for inclusion in the portfolio. In identifying such companies, the Fund relies on fundamental analysis, looking at Shariah-compliant stocks with the characteristics such as a comprehensive business model, sound management, strong cash generation / cash position, strong market positioning / growing market share, strong earnings growth / turnaround story, good financial track record, attractive valuations and catalyst for re-rating

The Shariah-compliant non-equity portion of the Fund is invested in Islamic money market instruments and domestic sukuk such as sovereign sukuk and corporate sukuk. The Fund will primarily focus on good quality investment-grade sukuk, relying, amongst others, on fundamental macroeconomic analysis, valuation analysis and credit analysis in identifying the Shariah-compliant securities. The investment process is one driven by the appreciation of fundamental value with focus on inflation-adjusted sukuk yields.

The Fund's investment may also include equity warrants traded in the local stock market which are Shariah-compliant. The strategy employed is similar to that of Shariah-compliant equity investment as described above.

The fund's property may consist of derivatives that are traded on an exchange or traded over-the-counter whose underlying instruments consist of permissible investments under the Guidelines and may also include indices, interest rates and foreign exchange rates.

The investment of the Fund may consist of unlisted Shariah-compliant securities and must be consistent with the objective of the Fund.

The exposure of the Fund to Shariah-compliant equities may result in the Fund experiencing significant volatility in times of adverse market movements. Temporary defensive positions may be undertaken to respond to the adverse market movements, which may affect the Fund's respective investment strategies.

Permitted Investments

The Manager has absolute discretion, subject to the Deed, the investment policy of the Fund and the requirements of the SC and other regulatory body, as to how the assets of the Fund are invested.

The Fund may invest in the following investments subject to the SC Guidelines, Shariah requirements and the Fund's objective and as approved by the SACSC and/or the Shariah Adviser:-

- Islamic futures contracts and options traded in futures and options market of an exchange approved under the Guidelines, and as approved by the SC's Shariah Advisory Council (SCSAC) and/or the Shariah Adviser, for hedging purposes only;
- Any other form of investments/instruments that comply with Shariah requirements as may be permitted by the relevant authorities, from time to time.

Investment Restrictions and Limits

The Fund is subject to the following investment restrictions and limits in the course of execution of its investment policies and strategies:-

- The value of fund's investments in unlisted Shariah-compliant securities must not exceed 10% of the fund's NAV. The exposure limit referred does not apply to "unlisted Shariah-compliant Securities" that are :
 - a) Shariah-compliant equities not listed or quoted on a stock exchange but have been approved by the relevant regulatory authority for such listing and quotation, and are offered directly to the fund by the issuer;
 - b) Islamic debentures traded on an organised over-the-counter (OTC) market; and
 - c) Islamic structured products.
- The value of the fund's investments in Shariah-compliant ordinary shares issued by any single issuer must not exceed 10% of the fund's NAV.
- The value of a fund's investments in transferable Shariah-compliant securities and Islamic money market instruments issued by any single issuer must not exceed 15% of the fund's NAV.
("transferable Shariah-compliant securities" are Shariah-compliant equities, Islamic debentures and Shariah-compliant warrants)
- The value of a fund's placement in Shariah-based deposits with any single institution must not exceed 20% of the fund's NAV.
- For investments in Islamic derivatives-
 - a) the exposure to the underlying assets must not exceed the investment spread limits stipulated in this schedule; and
 - b) the value of a fund's over-the-counter (OTC) transaction with any single counter-party must not exceed 10% of the fund's NAV;
- There will be no restriction or limit for Shariah-compliant securities issued or guaranteed by the Malaysian Government or Bank Negara Malaysia;
- The aggregate value of a fund's investments in transferable Shariah-compliant securities, Islamic money market instruments, Shariah-based deposits, OTC Islamic derivatives and Islamic structured products issued by or placed with (as the case may be) any single issuer/institution must not exceed 25% of the fund's NAV;
- The value of a fund's investments in units/shares of any Shariah-based collective investment scheme must not exceed 20% of the fund's NAV;
- The value of a fund's investments in transferable Shariah-compliant securities and Islamic money market instrument issued by any group of companies must not exceed 20% of the fund's NAV;
- A Fund's investment in transferable Shariah-compliant securities (other than Islamic debentures) must not exceed 10% of the Shariah-compliant securities issued by any single issuer;

- A Fund's investments in Islamic debentures must not exceed 20% of the Islamic debentures issued by any single issuer;
- A Fund's investments in Islamic money market instruments must not exceed 10% of the instruments issued by any single issuer. This limit does not apply to money market instruments that do not have pre-determined issue size;
- A Fund's investments in Shariah-based collective investment schemes must not exceed 25% of the units/shares in any one Shariah-based collective investment scheme;
- The net market exposure owing to the Islamic futures contracts position of the Fund must not exceed the NAV of the Fund; and
- Shariah-based liquid assets must be held in the form of cash, Shariah-based deposits with licensed institutions and/or other institutions licensed or approved to accept Shariah-based deposits, or any other Islamic financial instrument capable of being converted into cash within seven days; the value of the Fund's holding of Shariah-based liquid assets may be up to 100% of its NAV; However, this does not preclude the Manager (after consultation with the Trustee) from lowering or raising the Shariah-based liquid assets level beyond the stipulated level to allow the Manager to react to the prevailing market conditions and to manage investment risk when circumstances warrant it.

The aforesaid investment restrictions and limits have at all times to be complied with based on the most up-to-date valuation of the investments and instruments of the Fund. However, a 5% allowance in excess of any restriction or limit may be permitted where the restriction or limit is breached through the appreciation in value of the investments of the Fund due to market movements.

If a particular restriction or limit is breached, no further acquisition of the relevant investment may be made. The Manager will then, as soon as possible but in any event no later than three (3) months from the date of breach, take all necessary steps and actions to rectify the breach.

Such limits and restrictions, however, do not apply to Shariah-compliant securities that are issued or guaranteed by the Government or Bank Negara Malaysia.

PERFORMANCE BENCHMARK

Performance indicators or benchmarks are used to determine relative performance of portfolios and Shariah-compliant securities. They are particularly useful in evaluating unit trusts funds.

In Malaysia, the commonly used benchmark for measuring stock returns and equity unit trusts funds is the KLCI whereas for fixed income and bond/sukuk unit trust funds, it is the bank's GIA rate (e.g. Maybank's 12-month GIA Rate). Additionally, S&P's Micropal and Lipper Analytical Services are two of the fund services that track and analyse unit trust funds performance in Malaysia.

As for BSN Dana Al-Jadid this will be the performance benchmark :-

- a) If 100% invested in Shariah-compliant equities – FTSE Bursa Malaysia EMAS Shariah Index (FBMSHA), based on percentage change of FBMSHA for the period under review.
- b) If 100% invested in sukuk and Islamic money market instruments - 12-month Maybank (GIA) Tier II rate, based on the yield of 12-month Maybank (GIA) Tier II rate.

- c) If invested in a mix of Shariah-compliant equities, sukuk and Islamic money market instruments - 50% FBMSHA + 50% 12-month Maybank GIA Tier II rate. 50% of the benchmark performance is calculated based on the percentage change of the FBMSHA while the other half is based on the yield of 12-month Maybank GIA Tier II rate for the period under review.

VALUATION OF THE FUND

The manager will ensure that all the assets of the Fund will be valued at fair value and at all times be in compliance with the Guidelines and all relevant laws.

The valuation points for a Fund must be at least once every business day. Listed Shariah-compliant securities quoted on a stock exchange – valuation will be based on the last done market price of the Shariah-compliant securities which is the price at the end of a particular business day. In the case of newly subscribed issues e.g. rights and warrants which have not yet been traded, valuation shall be at cost.

Unlisted Shariah-compliant securities – valuation will be based at book cost or at a valuation verified by the auditor of the Fund and approved by the Trustee and qualified to value such investments.

Sukuk not listed on any recognised stock exchange – valued on a daily basis using fair value prices quoted by a bond pricing agency registered with the SC. However, if the Manager is of the view that the price quoted by the bond pricing agency differs from the market price by more than 20 basis points, the Manager may use the market price provided the Manager adheres to the requirements stipulated by the SC.

Other sukuk and Islamic money market instruments – valuation will be performed at least on a weekly basis. These methods of valuation are verified by the auditor of the Fund and approved by the Trustee.

Cash/Investment accounts - the valuation of such investments which are Shariah-based deposits placed with licensed financial institutions and bank bills shall be determined each day by reference to their nominal values and the accrued profit thereon for the relevant period.

Islamic money market instruments – valuation will be performed on daily basis by reference to the value of such investment as provided by the bank or the financial institution that issues the investment.

Units in Shariah-based collective investment scheme – valuation will be based on the last published repurchase price.

Islamic futures contracts – marked-to-market at the end of each trading day. Any gains or losses are immediately reflected.

Suspended Shariah-compliant securities – valued at their price at the end of the trading day prior to suspension unless there is conclusive evidence to indicate that the value of such Shariah-compliant shares have gone below the suspended price or where the quotation of the Shariah-compliant securities has been suspended for a period exceeding 14 days, then the Shariah-compliant securities shall be valued at fair value as determined in good faith by the Manager based on the methods or bases approved by the Trustee after appropriate technical consultation.

POLICY ON GEARING

The Funds is not permitted to borrow cash or other assets (including the borrowing of securities within the meaning of the Guidelines on Securities Borrowing and Lending) in connection with its activities. However the Fund may borrow cash for the purpose of

meeting repurchase requests for Units and such borrowings are subjected to the following:

- (a) the Fund's borrowing is only on a temporary basis and that borrowings are not persistent;
- (b) the borrowing period should not exceed a month;
- (c) the aggregate borrowings of the Fund should not exceed 10% of the Fund's NAV at the time the borrowing is incurred; and
- (d) the Fund may only borrow from licensed financial institutions.

The Fund shall seek for an Islamic financing facility to meet the above conditions.

RISK MANAGEMENT

Investing in a unit trust fund enables the investors to enjoy the benefit and advantage of diversifying their investments and assets. As with all investments, however, there are related risks.

Risks, though, are not necessarily bad or negative. They are something to be aware of and to be managed. Proper risk management accommodates investment volatility. This part of the Prospectus describes risks typical to the unit trust funds and how those risks are managed.

Proper risk management is ensured throughout the entire investment management process. Various measures include:

- Adhering to the Fund's investment objectives, policies and strategies.
- Undertaking stringent evaluation of movements in market prices and regularly monitoring, reviewing and reporting to the Investment Committee to ensure that all the Fund's investment objectives are met.
- Employing active and effective asset allocation strategy.
- Employing a stringent screening process by conducting fundamental analysis of potential investments.
- Practising prudent liquidity management in a timely and cost effective manner.
- May hedge against market when deemed appropriate after taking into account the costs of hedging.

SPECIFIC BENEFITS

The Fund allows investors the opportunity to benefit from the dynamic and active asset allocation mechanism of the Fund. During a prolonged stock market downturn, the Fund's ability to switch all assets into Shariah-compliant non-equity investments such as Islamic money market instruments and sukuk would limit the downside and provide the opportunity for re-entry at low levels. This dynamism saves the investors the additional sales charges and/or switching fee which may be incurred had they switched from equity funds into cash funds.

INVESTOR'S PROFILE

A unit trust fund is not necessarily suitable to all investors. This Fund is suitable for investors who:

- seek high returns;
- have moderate to high tolerance of risk;
- have medium to long-term investment horizons;

- seek a dynamic and actively managed equity fund that has the flexibility to shift from Shariah-compliant equities into sukuk and Islamic money market instruments in the event of a prolonged downturn in the stock market; and
- seek to invest in a Shariah-based unit trust fund.

SHARIAH INVESTMENT GUIDELINES

The following matters are adopted by IBFIM in determining the Shariah status of equity investments of funds.

Local Securities:

Reference for investment in local securities is based on the list of Shariah-compliant securities issued by the Shariah Advisory Council of the Securities Commission ("SACSC") twice yearly on the last Friday of May and November which is readily available at the Securities Commission's website. However, for Initial Public Offering ("IPO") company that has yet to be determined the Shariah status by the SACSC, IBFIM adopted the following qualitative and quantitative analysis in determining its Shariah status.¹

Quantitative Analysis

- 1) Based on the opinions of the SC and most International Shariah Advisory Boards, IBFIM excludes companies which main business activities involved the following:
 - a) Conventional financial services;
 - b) Gambling and gaming;
 - c) Manufacture or sale of non-halal products or related products (e.g. pork and liquor);
 - d) Manufacture or sale of tobacco-based products or related products;
 - e) Pornography;
 - f) Weaponry;
 - g) Entertainment activities that are not permitted by the Shariah.
 - h) Other activities deemed non-permissible according to the Shariah.
- 2) IBFIM deduces the following and ensure that they do not exceed the Shariah tolerable benchmarks:
 - a) Interest incomes over total incomes and profit before tax not exceeding 5%;
 - b) Income contribution from mixed activities which involve Shariah-prohibited elements such as interest-based businesses, conventional banks, insurance, gambling, liquor and pork over total incomes and profit before tax not exceeding 5%;
 - c) Income contribution from mixed activity which involve tobacco and tobacco-related businesses over total incomes and profit before tax not exceeding 10%;
 - d) Mixed rental income contribution from Shariah non-compliant activities over total incomes and profit before tax not exceeding 20%; and
 - e) Income contribution from mixed activities which involve businesses such as hotel and resorts, share trading and stock broking over total incomes and profit before tax not exceeding 25%.

Should any of the above deductions fail to meet the benchmarks, IBFIM will not accord a Shariah-compliant status for the companies.

Qualitative Analysis

IBFIM will look into the aspects of general public perception of the companies' images, core businesses which are considered important and *maslahah* (beneficial) to the Muslim

¹ This criteria is adopted by IBFIM as a temporary measure until the SACSC releases the Shariah status of that particular IPO company.

ummah and the country, the non-permissible elements are very small and involve matters like *umum balwa* (common plight and difficult to avoid), *'uruf* (custom) and rights of the non-Muslim community which are accepted by the Shariah.

Local Sukuk:

Based on the list of sukuk readily available at the Securities Commission website.

Islamic Money Market Instruments:

IBFIM will review the Islamic money market instruments based on the list readily available at the Bank Negara Malaysia and SC websites.

THE PORTFOLIO TURNOVER RATIO (PTR)

2008	2009	2010
0.59 times	0.93 times	0.61 times

Notes to the table :

- Portfolio Turnover Ratio (PTR) is the ratio of the average of the acquisitions and disposals of the fund for the year to the average value of the fund for the year calculated on daily basis, i.e.:

$$\frac{(\text{Total acquisitions of the scheme for the financial year} + \text{Total disposals of the scheme for the financial year}) / 2}{\text{Average net asset value of the scheme for the year calculated on daily basis}}$$

Average net asset value of the scheme for the year calculated on daily basis

The annual PTR ratio tells the frequency of the acquisitions and disposals of Shariah-based assets made by a fund. A PTR ratio of 200% shows that the fund had been traded over two times for that particular year.

Computation of PTR (for illustration purposes only) :	2010 RM million	2009 RM million
(a) <i>Average Net Assets Value of the fund</i>	35.18	31.12
(b) <i>Total acquisitions of the fund</i>	21.26	36.11
(c) <i>Total disposals of the fund</i>	21.66	22.04
<i>Portfolio Turnover Ratio</i>	$= \frac{[(b) + (c)] / 2}{(a)}$	$= \frac{[(b) + (c)] / 2}{(a)}$
	$= \frac{[21.26 + 21.66] / 2}{35.18}$	$= \frac{[36.11 + 22.04] / 2}{31.12}$
	= 0.61 times	= 0.93 times

Note:

Past performance of the fund is not an indication of its future performance.

Performance of the Fund compared to the Benchmark

Basis of calculation and assumptions made in calculating the returns:

$$(1) \text{ Rate of price return} = \frac{\text{NAV of fund in current year}}{\text{Adjusted NAV in base year}}$$

(After the adjustment of bonus issue/split)

$$(2) \text{ Rate of income return} = \frac{(\text{Gross dividend payment within the period})}{\text{NAV on ex-dividend date}} + 1$$

$$\text{Total return} = [(\text{Price return (1)} \times \text{series of income return (2)}) - 1] \times 100\%$$

MER is calculated as follows:

$$\frac{(\text{Fees} + \text{Recoverable Expenses}) \times 100}{\text{Average Net Asset Value of the Fund calculated on a daily basis}}$$

Average Net Asset Value of the Fund calculated on a daily basis

Explanation:

The total expenses incurred by the Fund for the year ended 31 December 2010 was RM601 thousand. The calculation of MER is as follows:

	2010	2009	2008
	RM'000	RM'000	RM'000
Management fee	531	482	185.22
Trustee fee	28	26	9.88

9. TRANSACTION INFORMATION

CALCULATION OF UNIT PRICES

Valuation Point

Valuation point is the time(s) on a Business Day as we decide, during which the NAV of the Fund is calculated. As the price per Unit of the Fund is determined using the forward pricing formula, the valuation point for the NAV per unit of the Fund, based on the valuation of the Fund's investments, assets and properties, is performed at the end of a Business Day upon closing of the Bursa Malaysia.

Single Pricing Policy

We adopt the single pricing policy in calculating your investment for Subscription and Repurchase of Units. Single pricing equates to the sales and repurchase of Units being quoted and transacted on a single price (i.e., NAV per Unit). Sales charges by different distribution channels are separately disclosed which make it easier for you to understand, compare and to make an informed decision on the choice of investment products and the preferred distribution channel. This will also facilitate you to clearly gauge or ascertain the performance of your investment. The daily NAV per Unit is valued at the next valuation point (i.e. the close of the Business Day) on forward price basis.

NAV of the Fund

The NAV of the Fund means the total value of all the Fund's investments and assets less the Fund's expenses or liabilities incurred or accrued at a particular valuation point.

NAV per Unit of the Fund

The NAV per Unit of the Fund is calculated by dividing the total NAV of the Fund by the total number of Units in circulation at the end of each Business Day.

Selling Price of a Unit

A sales charge of up to 3.00% of the NAV per Unit of the Fund may be imposed on the sale of the Units.

The illustrations below show how the NAV per Unit is derived, how the Sales Charge is calculated and how Units will be allocated to you.

As an example, if you invest RM10,000.00 in the Fund;

Selling Price of a Unit = NAV per Unit : RM0.5000

Sales charges = 3%

An investor wishes to invest a fixed investment amount of RM10,000.00

Units issued to investor = $\text{RM10,000} / \text{RM0.5000}$
= 20,000 units

Sales charges (3%) incurred by investor	=	RM300.00
Amount payable by investor	=	RM10,000.00 + RM300.00
	=	RM10,300.00

Repurchase Price of a Unit

The Buying Price (sometimes called Repurchase Price) of a Unit of a Fund is calculated by dividing the NAV of the Fund by the total number of Units of the Fund in circulation at the point of valuation; this is the same as the NAV per Unit of the Fund.

Assuming that the NAV per Unit of the Fund is RM0.25732820, as shown on the illustration above, the Buying Price will be:

$$\begin{aligned}
 &= \text{NAV per Unit} \\
 &= \text{RM0.25732820} \\
 &= \text{RM0.2573 (rounded to four decimal places)}
 \end{aligned}$$

Your repurchase proceeds are based on the Buying Price at the next valuation point upon receipt of your request. Assuming you request to Repurchase 5,000 Units of the *Dana Al Jadid* on 15 February 2008 and the Buying Price as at the next valuation point (which is published on the following day) is RM0.5000 per Unit, as shown in the illustration above, the Repurchase proceeds that you will receive will be:

$$\begin{aligned}
 &= 5,000 \text{ Units} \times \text{RM0.5000} \\
 &= \text{RM2,500.00}
 \end{aligned}$$

Repurchase proceeds will be paid within 10 business days of the date of receipt of a repurchase request.

If a Friday is not a Business Day, the Price Determination Point for the purpose of determining the Repurchase Price will be 5:00 p.m. Malaysian time on the Business Day after that Friday.

The NAV per Unit will be published in major local newspapers on every day following a Business Day. Whilst the Manager can ensure that the prices forwarded to the newspapers for publication are accurate, the Manager cannot assume any responsibility or be liable for any error in the prices finally published in the newspapers.

1.3 Deductibility of expenses

Section 33(1) of the MITA allows expenses incurred “wholly and exclusively in the production of gross income” to be deductible against the gross income, e.g. interest incurred on a loan to finance investments can be deducted against the dividend income or interest income from that investment.

In addition, Section 63B allows partial deduction for other non-direct expenses known as “permitted expenses”. “Permitted expenses” comprise the manager’s remuneration, charges for maintenance of register of unit holders, share registration expenses, secretarial, audit and accounting fees, telephone charges, printing and stationery costs and postage. The amount deductible is calculated based on the formula below:

$$A \times \frac{B}{4C}$$

where

A	is the total of the permitted expenses incurred for that basis period;
B	is gross income consisting of dividends, interest and rent chargeable to tax for that basis period; and
C	is the aggregate of the gross income consisting of dividends (whether exempt or not), interest and rent, and gains made from the realisation of investments (whether chargeable to tax or not) for that basis period.

Provided that the amount of deduction to be made shall not be less than 10% of the total permitted expenses incurred for that basis period. In short, the deductible expenses will be a minimum of 10% and a maximum of 25% of the total permitted expenses.

Should the deduction exceed the income assessable to tax, the excess is not allowed to be carried forward for offset against the income of future years of assessment.

1.4 Real Property Gains Tax (“RPGT”)

Capital gains arising from the disposal of real properties or shares in real property companies would attract real property gains tax (“RPGT”) at the tax rate of 5% if the disposal is made within 5 years from the date of acquisition of the chargeable assets. If the disposal is made after 5 years from the date of acquisition of the chargeable assets, the capital gains arising from the disposal would be exempted from RPGT under the *Real Property Gains Tax (Exemption)(No. 2) Order 2009*.

2. TAXATION OF UNIT HOLDERS

2.1 Distribution of taxable income

Unit holders will be taxed on their share of the total taxable income of the Fund distributed to them. This income distribution carries with it a tax credit for the tax paid by the Fund on its taxable income. This tax credit may be utilised by the unit holders to set off the tax payable by them. The tax authorities will refund any excess of tax credit over tax chargeable on the unit holders.

Distributions of income from the Fund received by individuals and other non-corporate unit holders who are residents in Malaysia for tax purposes will be taxed at graduated rates. Individuals and other non-corporate unit holders who are not tax residents in Malaysia, will be subject to tax at the non-resident rate applicable of 26% on the distributions of income received.

Corporate unit holders, whether resident or not resident in Malaysia, will be subject to tax at the corporate tax rate of 25% on the distributions of income from the Fund received by them. For small and medium scale companies with paid-up capital of RM2.5 million and below ("SME"), the corporate tax rate applicable is 20% on the chargeable income of up to RM500,000 and 25% on the amount exceeding RM500,000. However, a company with a paid-up capital of not exceeding RM2.5 million will not qualify as a SME under the following circumstances:

- i. more than 50% of the paid up capital in respect of ordinary shares of the company is directly or indirectly owned by a "related company";
- ii. more than 50% of the paid up capital in respect of the ordinary shares of the "related company" is directly or indirectly owned by the first mentioned company; or
- iii. more than 50% of the paid up capital in respect of the ordinary shares of the first mentioned company and the "related company" is directly or indirectly owned by another company.

"Related company" is defined as a company which has a paid-up capital exceeding RM2.5 million in respect of ordinary shares at the beginning of the basis period for a year of assessment.

2.2 Distribution of tax exempt income

Distributions of tax exempt income by the Fund from gains from realisation of investments, exempted interest/discount income, exempted dividends including single tier dividends and foreign sourced income, will be exempted from tax in the hands of the unit holders.

2.3 Unit splits and sale, transfer or redemption of units

Unit splits issued by the Fund are not taxable in the hands of the unit holders. Any gains realised by unit holders (other than dealers in securities, insurance companies or financial institutions) from the sale, transfer or redemption of the units are treated as capital gains and thus, will not be taxable.

However, the gains realized by a person trading or dealing in securities, insurance companies or financial institutions are generally regarded as business income and are subject to income tax.

We hereby confirm that, as at the date of this letter, the statements made correctly reflect our understanding of the tax position under the current Malaysian tax legislation

and the related interpretation and practice thereof, all of which are subject to change, possibly on a retrospective basis. In addition, unit holders are advised to seek professional advice on their respective tax positions.

Yours faithfully
